Technical and Bibliographic Notes/Notes techniques et bibliographiques

The Institute has attempted to obtain the best original copy available for filming. Features of this copy which may be bibliographically unique, which may alter any of the images in the reproduction, or which may significantly change the usual method of filming, are checked below.

L'Institut a microfilmé le meilleur exemplaire qu'il lui a été possible de se procurer. Les détails de cet exemplaire qui sont peut-être uniques du point de vue bibliographique, qui peuvent modifier une image reproduite, ou qui peuvent exiger une modification dans la méthode normale de filmage sont indiqués ci-dessous.

The copy filmed here has been reproduced thanks to the generosity of:

Library Division
Provincial Archives of British Columbia

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol \rightarrow (meaning "CONTINUED"), or the symbol ∇ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

Library Division
Provincial Archives of British Columbia

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole \rightarrow signifie "A SUIVRE", le symbole ∇ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

Vocabulary of the Kwakiutl Language.

By Dr. Franz Boas.

(Read before the American Philosophical Society, November 18, 1892.)

The Kwakiutl language is spoken on the coast of British Columbia, from Cape Mudge to Douglas and Gardner Channels, excluding Dean Inlet and Bentinck Arm, which are occupied by the Bilqula. The language forms a branch of the Wakashan stock, being affiliated with the Nootka or Aht of the west coast of Vancouver Island. The form of these languages reminds us in many respects of that of the Salishan stock, and it may be that a connection exists between both.

The Kwakiutl language is spoken in three dialects. The Kwakiutl proper, the Hëiltsuk' and the Gylt'amā't. The first is spoken by the tribes of Vancouver Island and of the coast southeast of Rivers Inlet; the second by the tribes inhabiting the coast between Rivers Inlet and Gardner Channel; the last in Gardner and Douglas Channels. It will be found that phonetics and vocabulary of the northern and southern tribes are much alike, while the middle dialect stands more apart. This is probably due to the admixture of Bilqula elements in the central region.

The vocabularies contained in the following pages were collected by the author in 1886, 1888, 1889, 1890. As slight differences are found between the vocabularies of the various tribes, the tribe from which the words were collected are given. The following abbreviations have been used:

L. for Lē'kwiltok',	}	Kwakiutl Dialect.
N.—Nimkish,		
K.—Kwakiutl,		
TL.—Tlatlasik'oola,	}	Hëiltsuk' Dialect.
A.—Awī'ky'ōnoq.		
H.—Hë'iltsuk',		
G.—Gylt'amā't,		Gylt'amā't Dialect.

The literature of this language is very scanty. The following writings are of importance:

W. FRASER TOLMIE and GEORGE M. DAWSON, *Comparative Vocabularies of the Indian Tribes of British Columbia*. Montreal, 1884.

G. M. DAWSON, *Vocabulary in Trans. Royal Soc. of Canada*, 1887, ii.

A. HALL, *A Grammar of the Kwakiutl Language, Trans. Royal Soc. of Canada*, 1888, ii, pp. 59-105.

F. BOAS, "Grammatical Notes on the Kwakiutl Language," in the "Sixth Report of the Committee on the Northwestern Tribes of Canada," *Proc. British Association for the Advancement of Science*, 1890.

THE GOSPEL according to Saint John, translated into the Qāgūtī Language. London, 1894 (by Rev. A. F. HALL).

THE GOSPEL according to Saint Matthew, translated into the Qā gūtī (or Quoquois) Language. By Rev. A. F. HALL. London, 1892.

The following alphabet has been used ; the vowels have their continental sounds :

â = *aw* in *law*.

ē = *e* in *flower*.

Consonants.—The following consonants require a special description :

k', g'.

k, g.

ky (kū), gy.

This is a series of *k* sounds beginning with the posterior guttural *k'*, passing through the ordinary *k* to the anterior palatal *ky*. There is a tendency in the Hëlltsuk dialect to transform *ky* and *gy* into *k* and *g*. The distinction between sonans and media is here, as in many other Indian languages, exceedingly difficult, and it may be that to the Indian ear there is no real distinction between both classes. The same is true in the case of labials and dentals. *s* and *c* (= English *sh*) are evidently modifications of the same sound ; *s* is always pronounced with open teeth and post-alveolar position of the tip of the tongue. Thus it obtains a similarity with *c*, while the latter partakes in the same way of the characteristics of *s*.

q, q, h correspond to k, k, ky, the first being the German guttural *ch* in *ach*, the last the German palatal *ch* in *ich*, the q an intermediate sound like *ch* in the Westphalian dialect.

The vowels of the Kwakiutl language are extremely variable, and I have not been able to ascertain satisfactorily the meaning of lengthening and shortening, of apparent contractions and diæresis. I had, therefore, to confine myself to give the various forms which I obtained from the Indians. We find a series of very indistinct vowels which are not articulated, but indicated by position of the mouth. The most frequent among these is *u* following a terminal *k*, for which I have used the sign ' ; for instance, in the passive participle —*k'*. In compounds, when a syllable follows the —*k'* the *u* is often articulated.

Pauses in words are very frequent, and are almost always accompanied by an increased stress of the preceding consonant. I have found it impossible in this language to distinguish clearly between consonants articulated with ordinary stress and increased stress, although the latter are undoubtedly found, *p. e.*, *ky'ê*, *no*.
